Re: Cover Letter

Applicant: TagMaster AB

FCC ID: M39LRXX

To whom it may concern,

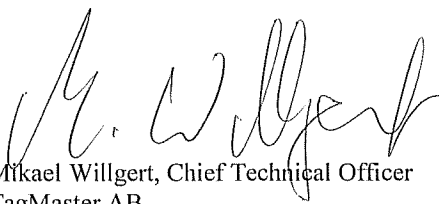

Cover Letter Class II Permissive Change

TagMaster AB hereby authorize Intertek Semko AB, Sweden, to act as agent in the preparation of this class II permissive change application under FCC ID: M39LRXX, earlier Granted 27 July 2006, for equipment authorization to the Federal Communications Commission. I certify that submitted Exhibits properly describe the device with FCC ID: M39LRXX.

The following changes have been made to the equipment with FCC ID M39LRXX:

Type S1566 has previously been certified using FCC ID: M39LRXX. It has now been modified to improve computational power and in order to remove older component types that are end-of-life from the product. In detail the S1566 has been given a new controller board. The changes do not affect the RF parts of the device.

The new type LR-6 is based on the same identical radio design as the existing product S1500 that has been certified using FCC ID: M39LRXX. The LR-6 has been given a new mechanical design including external and internal parts and a new controller board for improved computational power.
