

American Telecommunications Certification Body Inc.

6731 Whittier Ave, McLean, VA 22101

September 19, 2002

RE: FCC ID: M3N-65981401

Attention:

I have a few comments on this Application.

1. The label information does not say what the label is made of. Is it etched on the plastic. In accordance with Part 2.925, how is the label Permanently affixed? "Permanently affixed" means that the required nameplate data is etched, engraved, stamped, indelibly printed, or otherwise permanently marked on a permanently attached part of the equipment enclosure. Alternatively, the required information may be permanently marked on a nameplate of metal, plastic, or other material fastened to the equipment enclosure by welding, riveting, etc., or with a permanent adhesive. Such a nameplate must be able to last the expected lifetime of the equipment in the environment in which the equipment will be operated and must not be readily detachable."
2. ANSI C63.4 requires the use of calibrated equipment when the equipment is used in measurements that "have a significant effect on the accuracy or validity of measurements" (Sec 4.4). The equipment specified in the report has no indication as to the calibration of this equipment. Please provide the calibration dates of the equipment. If the equipment calibration is older than one year, please provide evidence that the cal cycle greater than one year is justified.
3. The FCC requires the manual be provided not just the FCC statements. Please provide the actual manual that will be used with this device.
