

SKREEK Variants:

The products to be certified are the hand held remote control units (fobs) for the DaimlerChrysler SKREES CS and RS vehicle platforms. There are five devices to be approved.

For the RS vehicle platform:

Two will be three button – one with a Dodge badge on the back housing and the other with a Chrysler badge on the back housing.

Two will be a six button – one with a Dodge badge on the back housing and the other with a Chrysler badge on the back housing.

For the CS vehicle platform:

One four button – with a Chrysler badge on the back housing.

The parts vary in form (plastic housing and button number) but function identically and have identical schematics. The devices also have **identical** printed circuit boards. All modules will use the same FCC and Canada ID Numbers.
