

Description of Operation

EUT is a 802.11g SMB Wireless Access Point with 13 channels. This device provided four kind of transmitting speed 1,2,5.5 and 11Mbps. The device of RF carrier is DQPSK,DB PSK and CCK. The device adapts direct sequence spread spectrum modulation. The Connector antenna was scolded on DIPOLE provided diversity function to improve the receiving function.

This 802.11g SMB Wireless Access Point is an IEEE 802.11b&g Wireless LAN adapter. It allows your computer to connect to a wireless network and to share resources, such as files or printers without being bound to the network wires. Operation in 2.4GHz Direct Sequence Spread Spectrum (DSSS) or Orthogonal Frequency Division Multiplex (OFDM) radio transmission, the 802.11g SMB Wireless Access Point transfers data at speeds up to 64/128-bit Wired Equivalent Protection(WEP) algorithm is used. In addition, its standard compliance ensures that it can communicate with any 802.11b&g network.
