

Date: 2020-04-14

Cover Letter for re-use of Test Data

To Whom It May Concern:

The initial application has been granted according to 47CFR Part 15E, RSS-247 for FCC ID: M72-TC60ND, IC: 1849C-TC60ND ; Granted on 04/24/2020

The new equipment to be Granted in this new application, according to FCC ID: M72-TC60FR, IC: 1849C-TC60FR only differs from the initial version (FCC ID: M72-TC60ND, IC: 1849C-TC60ND) with the only one following point:

1. Adding DECT module in equipment (RF CHIP name: DCX81 Crystal: 13.824 MHz)
Please refer to the Internal Photos exhibits (page 8)

The one changes described above do not affect the radio characteristics (802.11a/b/g/n) of the equipment. Consequently, radio test data retrieved from the initial application FCC ID: M72-TC60ND, IC: 1849C-TC60ND can be re-used for the FCC ID: M72-TC60FR, IC: 1849C-TC60FR equipment.

However, based on our knowledge and our engineering judgment of the device design, the changes made, the format and amount of spot-check test data are decided as below,

1. Sample amount: 1
2. Spot-check rule part, frequency band and test items

Sample		
FCC/IC Rule Part	Frequency Band	Test Items
FCC Part 15C/RSS-247	2412-2462 MHz	1. radiated emission - Band edge and Harmonics 2. Conducted output power 3. AC power line conduction.
FCC Part 15E/RSS-247	5180-5825 MHz	1. radiated emission - Band edge and Harmonics 2. Conducted output power 3. AC power line conduction.
FCC Part 15C/RSS-247	2402-2480MHz	1. radiated emission - Band edge and Harmonics 2. Conducted output power 3. AC power line conduction.

We, Polycom Inc. is taking full responsibility to re-use these test data for its new application FCC ID: M72-TC60FR, IC: 1849C-TC60FR .

Polycom, Inc.
