

Label Location Justification Letter

Date: 11 February 2026

FCC ID: MCQ-CCMP2

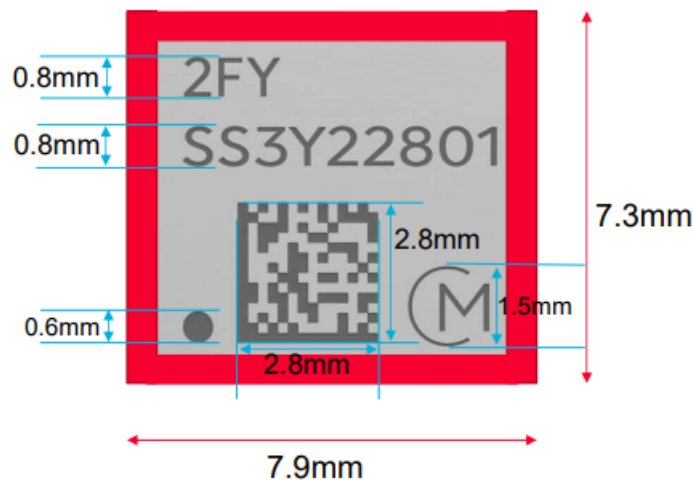

IC: 1846A-CCMP2

Product Name: LBEE5HY2FY, LBEE5HY2GY

Model (HVIN): LBEE5HY2FY, LBEE5HY2GY

Since the module is too small to put the required FCC ID and ISED certification information with a minimum 4-point font size, this information will be placed in the user manual and packaging of the device.

The module size is less than 7.9*7.3mm and thus there is not enough space to put the required FCC ID and ISED certification number directly on the device.

Sincerely,

A handwritten signature in black ink, appearing to read "Dan Kobylarz".
