RE: Manufacturer's Attestation for FCC ID: MFMSAMP24W

Please note the following as it relates to this application:

- 1) Channels 1, 2, 10 and 11 will be restricted for this application, per the Installation Manual. The system is installed by professional installers who are aware that Channels 1, 2, 10 and 11 cannot be used. Channels 3-9 are the only available channels after installation.
- 2) a) This system is intended to be used for long range point to point and point to multipoint systems.
b) The installation requirements are: Professional installation is required because standard connectors are applied.
c) The method of marketing consists of selling this device as a part of a complete system, which includes the Cisco Access Point, Cisco PCMCIA Card and the Teletronics Amplifier with the Teletronics DC Injector, as presented in this application under review. Specifically, the Cisco kit will include, Teletronics 1 watt amplifier model # 2400-1W, Cisco Access Point unit AIR-AP352E2R , or the Multifunction Bridge unit AIR-BR350-A-K9.

Sincerely,

Nusrat Jamal
Vice President / General Manager
