Subject: Re: FCC ID: MQ4WB1K5S (mail-1)

Dear Timothy,

Because our client, AboCom Systems, Inc., decided to apply for Module approval,
we remeasured the test as per FCC P15 standard recorded in the report.
But I have one question need your opinion.
Because this project (applied for end-user) has submitted to your review before,
it changes to apply for Modular approval now.
Should I send all the documents to you for reviewing or it would be ok if I just send
the relative documents to you?

Even though I'm awaiting your comments, I still send all the documents to you for reviewing which deems to a new project.
And I hope that won't be too confused for you too much.

Because our client is very urgent to know the status, if you have any comments after reviewing, please contact us as soon as possible.
Thank you very much for your kindly help.

Since the documents will be larger than our mail limit for sending out, thus I'll send the TCF by two separate mails.

If you have further questions, please feel free to contact me.

Best regards,
Julia Chu
