

The diagram shows a top-down view of a rectangular device chassis. It features a central rectangular cutout. On the right side of the chassis, there is a vertical strip of components, including a green multi-pin connector and a larger rectangular module with a green top section. Below this module is a circular component with an upward-pointing arrow and the number '9'. The chassis is secured with screws around its perimeter. The text 'Label location' is written in red in the center of the chassis.

Label location
