- Change #3: The software security information is kept the same as the module's original application.
- Change #4: Add one antenna which has the same antenna type as original grant, and each antenna gain is lower than the original application. Please refer to the SAR report for the details.
- Change #5: According to the WIFI 6E test report(RFBWIN-WTW-P21040653-6) submitted in the initial filing, the CBP test is based on the minimum antenna gain 0 dBi.
