

Class II Permissive Change Letter

Date: 2026/7/31

FCC ID: MSQ-RTL8852CE

Original Grant Date: 09/16/2024 (DSS, DTS, NII, 6CD) and 05/26/2026 (6VL)

Pursuant to CFR 2.1043, (ASUSTeK COMPUTER INC.) hereby requests a Class II Permissive Change.

Modification:

- Change #1:** The subject approved module is integrated in a new host (product: Notebook PC, Model: B5406FMA, B5456FMA). All models are RF electrically identical (including appearance, dimensions, I/O ports, antenna(s) and antenna location (and distances to each edge)), different model names are for marketing purpose.
- Change #2:** Adjust Wi-Fi/BT/BLE output power through BIOS that cannot be changed by end user and SAR were evaluated accordingly.
- Change #3:** Add new antenna which has the same antenna type as original grant, and each antenna gain is lower than the original application. Please refer to the SAR report for the detail.
- Change #4:** The software security information is kept the same as the module's original application.
- Change #5:** According to the WIFI 6E test report (Report No.: FR1N0223-01) submitted in the initial filing, the CBP test is based on the minimum antenna gain -5dBi. In this application, the lowest antenna gain of WIFI 6E band is 0.4dBi, which is not lower than original one, the new CBP testing is not required accordingly.

Thank you for your attention to this matter.

Sincerely,

Jackson Yen / Associate Vice President
ASUSTeK COMPUTER INC.
