

ASUSTeK COMPUTER INC.

Class II Permissive Change Letter

DATE : 2025/11/3

To Whom It May Concern:

The purpose of this letter is to request Class II Permissive Change for:

FCC ID: **MSQBE201NG**

Original Grant Date: **04/02/2025 (DSS, DTS, NII, 6CD)**

Pursuant to CFR 2.1043, (**ASUSTeK Computer Inc**) hereby requests a Class II Permissive Change. Modification:

-Change #1: Additional chassis added, ASUSTeK, model number: UX8407A

Models differences: All models are electrically identical (including appearance, dimensions, I/O ports, antenna locations, and RF electrically), different model names are for marketing purpose.

-Change #2: Reduces WIFI output power through BIOS that cannot be changed by end user and SAR were evaluated accordingly.

- Change #3: The software security information is kept the same as the module's original application.

- Change #4: Add one antenna which has the same antenna type as original grant, and each antenna gain is lower than the original application. Please refer to the SAR report for the details.

Change #5: According to the WIFI 6E test report(250519-02.TR33) submitted in the initial filing by Intel, the CBP test is based on the minimum antenna gain -4.32 dBi. In this application, the lowest antenna gain of WIFI 6E band is 1.67dBi, which is not lower than original one, so the new CBP testing is not required accordingly.

Thank you for your attention in this matter.

Best Regards,
