

MYF-XI-325X
End-User Instalaton Kit
Operational Description

The HA-XI-325X End-User Installation Kit is designed for installation in a PC by an end-user. It is equipped with non-standard RF connectors. No standard RF connectors are used anywhere in the system.

The channel selection is limited in firmware only to those authorized, and there is no way for the end-user to alter this channel selection using the driver software or otherwise.

What's Included: The System consists of the PC Card, Amplifier Kit and Antenna, all of which have non-standard RF connectors.
