

Declaration of additional product variants of Notion Transmitter Data Logger.

The following variants of the product Notion Transmitter Data Logger model IN-TH001F2, use the same transmitter IC, circuit and PCB in an identical manner using the same antenna and will behave the same in terms of the radio performance. Note the F2 designation defines FCC frequency product.

The variants are

IN-WT002F2	Single channel temperature transmitter + Door Alarm input.
IN-WT003F2	External temperature probe.
IN-WT004F2	External temperature probe + Door Alarm Input.
IN-THD01F2	Single channel Probes.
IN-TH002F2	Dual channel remote Probes.
IN-TH003F2	Dual channel internal + external Temperature probe.
IN-TH004F2	Dual channel with two external temperature probes.
IN-PT001F2	Single channel PT100 temperature probe.
IN-PTD01F2	Single channel PT100 temperature probe + door Alarm input.
IN-PT00F2	Dual channel PT100 temperature probes.
IN-TT001F2	Single channel PT100 temperature probe.
IN-TT002F2	Dual channel PT100 temperature probes.
IN-TTD01F2	Single channel PT100 temperature probe + door Alarm input.
IN-MA001F2	Dual channel 4-20mA inputs
IN-VT001F2	Dual channel 0-1 volt inputs
IN-VT002F2	Dual channel 0-5 volt inputs
IN-VT003F2	Dual channel 0-10 volt inputs
IN-RH001F2	RH/T Fixed probe.
IN-RH002F2	RH/T Remote probe.
