

1.2.7

Exhibits Tab

The Exhibits Tab opens displaying all the possible exhibit types that the FCC may require for an application. To view exhibits that were uploaded through the internet, or scanned in, click on the desired exhibit type. If there is an exhibit in the database for that type, it will be displayed on the right along with the date it was received/scanned.

Once the exhibit is uploaded, it will display in it's PDF format. If, at a later time the exhibit needs to be viewed, double click on the Acrobat Document Icon on the right and it will open.

Description: This section should include information to the user's highlighted information in the user's highlighted information, manuals with required instruction, installation, operators.
