## Request for FCC Modular Approval

We hereby request a full modular approval for the FCC ID referenced above. The module meets the requirements in the § 15.212 rules for unlicensed modules listed below.

- a) The module has its own shielding.
- b) The module has buffered modulation/data inputs to ensure that the module will comply with Part 15 requirements with any type of input signal.
- c) The module has power supply regulation on the module.
- d) The module is approved with +6 dB antenna gain and can be used with any antenna of the similar type, as listed in the accompanying antenna documents, with a gain lower than +6 dB.
- e) The module has demonstrated compliance in a stand-alone configuration.
- f) The module will be labeled with its permanently affixed FCC ID label, as described in the accompanying label document.
- g) The module complies with all specific rules applicable to the transmitter including all the conditions provided in the integration instructions.
- h) The module complies with RF exposure requirements.
