

ATTESTATION

Date: March 9, 2026

RE: Attestation of Indoor Access Point Operation (6ID)

FCC ID: N6C-SDMAX6E

ISED certification number: 4908A-SDMAX6E

Dear Examiner,

We, Silex Technology, Inc., attest that this device complies with the following requirements of the FCC's and ISED's rules for the 6GHz bands and will document the physical restrictions associated with the equipment classes for host products (wired power, integral antenna, non-weatherized enclosure) as conditions of use through the host manufacturer's integration instructions:

1. Contention-Based Protocol, as demonstrated in the test report, is permanently embedded in the module and is not host-dependent.
2. The AP uses the IEEE 802.11 beacon signaling to inform the associated client/subordinate device of its permitted maximum power. The IEEE beacon contains a 6GHz Operation Information subfield. The subfield will contain information identifying the AP as a LPI AP and a Maximum Transmit Power Interpretation subfield.
3. We acknowledge that Access Point operating in the 5.925-7.125 GHz band shall be supplied power from a wired connection, has an integrated antenna, is not battery powered, and does not have a weatherized enclosure.
4. We acknowledge this device is subject to and in full compliance with the device restrictions listed below. All users are notified of these restrictions through the user manual.
 - This device's operation will not be allowed on oil platforms, cars, trains, boats, and aircraft, except that operation of this device is permitted in large aircraft while flying above 10,000 feet.
 - Indoor access points are prohibited for control of or communications with unmanned aircraft systems, including drones.
