Details of:	Internal view 1
	

Details of:	Internal view 2
	

Details of:	PCB view 1 for main board
	 A photograph of the main board (PCB view 1) showing a green printed circuit board with various electronic components. A yellow ruler is placed vertically on the left side of the board, and another yellow ruler is placed horizontally below the board. The board is connected to a white plastic housing with a red wire and a black wire. A black circular component is visible on the right side of the board.

Details of:	PCB view 2 for main board
	 A photograph of the main board (PCB view 2) showing a green printed circuit board with various electronic components. A yellow ruler is placed vertically on the left side of the board, and another yellow ruler is placed horizontally below the board. The board is connected to a white plastic housing with a red wire and a black wire. A red arrow points to a component labeled "BT Antenna" on the right side of the board.

Details of:	PCB view 1 for BT module
	 A photograph of a small, rectangular blue printed circuit board (PCB) component, identified as a BT module. The module is positioned on a yellow ruler for scale. The ruler has markings in centimeters (0 to 5) and millimeters. The module is oriented vertically, with its longer side parallel to the ruler's edge. The background is a solid blue surface.

Details of:	PCB view 2 for BT module
	 A photograph of the same blue printed circuit board (PCB) component, identified as a BT module, from a different perspective (view 2). The module is positioned on a yellow ruler for scale. The ruler has markings in centimeters (0 to 5) and millimeters. The module is oriented vertically, with its longer side parallel to the ruler's edge. The background is a solid blue surface.
