Dear Sir or Madam,

Please find enclosed a completed FCC Form 731 for N7TAC201TX. This was previously certified by the FCC. The date of the grant was March 8, 2001. We now wish to request confidentiality on the following exhibits.

As long as these documents remain public access on your website, it jeopardizes our competitiveness and success in the American market. It leaves us vulnerable to our competitors who benefit from this confidential information and technology.

The following information is only given out to individuals or testing agencies on a need-to-know basis. Other individuals are required to sign confidential disclosure agreements before we release such documents.

We need the following information to remain confidential for a period of 15 years.

We were quite surprised to find our information available on the website. We have received certification in other countries without having such documentation available for public review.

#### **Block Diagram**

This document contains sensitive information about how the transmitter functions.

#### **Operation Description**

This document details all the technical specifications of the receiver and transmitter. With this document, any competitor can reproduce and market our monitors.

#### **Parts List / Tune Up Info**

This document is highly confidential. It is the bill of material for the transmitter.

#### **Schematics**

This document is highly confidential. It is the drawing of the circuitry board of the transmitter. Any individual with circuitry knowledge can build their own transmitter based on Angelcare's technical specifications.

Best regards,

Sylvie Charette
