

- **Model:#001A21**
- **Circuit Description:**

The 433 MHz RF transmits 36-bit PWM signal, when the air quality sensor signal is input to the 8 bit high-performance micro-controller (HT49R30A-1) for modulating.

RF section, Ground and Power Source

It isn't equipped with external antenna and external ground connection. The ground part is just the printed circuit board. Electric current is supplied by 4pcs of AAA size batteries.
