Re: FCC ID NATTX433B

Applicant: SmarTire Systems Inc
Correspondence Reference Number: 1625
731 Confirmation Number: EA87902
Date of Original E-Mail: 6/30/98

Subject: Interpretation regarding FCC ID NATTX433B

I spoke with Mr. Cobbs regarding the situation and he felt that the only real options available were the following. With all due respect it appears that the last two will be somewhat difficult considering the complexity of the situation.

1. Test transmitter off the rim in much the same way you would test any other transmitter.
2. Do test using three representative configuration and these must be shown to be representative.
3. Test in one configuration only and provide argument to support the configuration selected.
