Confirmation Number: EA95894

CC: Larry Zhou

Dear Sir or Madam,

Recently, it was brought to our attention that the location of the FCC Identification label would require some clarification. I am writing to specify the location of this label to be placed on the backside of the equipment in a clear viewing area. This statement appears on the label drawing (CT-01405) as note 2. For your reference, I have attached a copy of the drawing and have highlighted this note.

Please take a moment to review this drawing and let me know if there are any additional questions. I can be reached via email at rpalmer@pronetracking.com or by phone at (972) 687-2189.

Sincerely,

Robert Palmer
Sr. Mechanical Engineer
ProNet Tracking Systems
