

- 1) MBF40 Series Repeater Product labels are generated using the Axell Serial Information System (ASIS) Serial Numbers are assigned according to Part Number and stored in an Electronic database
- 2) Label templates are designed and attached to each Part Number record in the database. Templates contain Frequency Band Information and FCC Identification. This information is locked to the Part Number by the database.
- 3) Production Operators have read only access to the database. Part Numbers, Label Templates and their contents are controlled by Axell Engineering and Configuration management.
- 4) To generate a new serial number login to ASIS (password required) and select Serial Numbers tab. Select the New Button. Enter Operator ID, Part Number and Qty of Labels to generate. Press OK button. Serial Numbers will be generated and added to database.
- 5) Select Print Button, enter Operator ID, select Serial Number Range and press Next. Labels to be printed will appear on the screen which follows. Confirm the Part Number and Serial range to be printed are correct. Press Print button or Cancel. Printed Labels will be output from the defined Printer for the Label template media.
- 6) Attach the Product ID Label (yellow) to the right hand side of MBF40. Position label 5mm above the lower lid screw fixing, with bottom edge of label (Bar Code) against side step for alignment.
- 7) Attach the FCC LICENSE WARNING Label immediately adjacent to the Serial Number Label with matching text orientation as shown.

NOTE: This step is only applicable to US Variants of MBF40 series. (If required the label will print automatically)
