RE: FCC ID: NHVWDJ441
Attention:

I have a few comments on this Application.

1. Please remove the shield covering the components in the upper left corner of the internal photo for the top of the board. Please provide photos of what is under this shield.
2. The manual would indicate that there are a number of antennas used with this device. The schematics are not sufficiently clear enough to determine the antenna useage for this device. Please confirm that there is only one transmit antenna and please identify this antenna. If the device does transmit on more than one antenna, please describe how it transmits on only one at a time. If the device transmits on more than one antenna at a time, please explain the measures you have taken during testing to insure that testing was performed with all antenna(s) transmitting at the same time and that the emissions from the system is not over the limit. If the latter is the case, please note that all 7 antennas must be used during testing and all five must be located in a typical arrangement.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
