

Digital Data Base Station - EB450

E Series

Features and Specifications

Trio DataCom's EB450 is an advanced Full Duplex Base / Repeater Station that complements the ER450 remote data radio modem. E Series data radio modems are suitable for the most complex and demanding digital high speed Point-to-Point and Point-to-Multipoint (Multiple Address Radio) SCADA and telemetry applications.

Base stations and repeaters are key elements in data radio communication systems and are subject to heavy duty cycle operation. The EB450 delivers highly reliable, continuous full duplex operations at maximum (5W) output power.

The high performance E Series data radio system products also include the EH450 Hot Standby Base / Repeater station.
