Subject: Emission Designator: 12K8F1D

RE: FCC ID NIQM9KMOBITEX
Applicant: Schlumberger Technologies.
FCC Correspondence No. 16759
731 Confirmation No. EA98370
Date of Original e-mail: October 25, 2000

Dear Mr. Dichoso:

The following item is in response to your e-mail requesting clarification of emission designator:

*The device is using an approved transceiver with an emission designator of 12K8F1D.
You claim that there are no changes but request an emission designator of 28K8FXW.
Please explain. The bandwidth submitted justifies 12K8F1D.*

Response: Yes, you are right that the proposed emission designator ought to be 12K8F1D, considering the bandwidth requirement. In addition, since the approved transceiver used in the Schlumberger product is a sealed unit and no changes were made to the transceiver itself and no external circuit deployed at the RF output (like matching network for the antenna) can alter the parameters, the originally declared bandwidth does not change as you had pointed out. As such, the proposed emission designator is 12K8F1D. Inadvertently, we had registered incorrect emission designator (28K8FXW) in the 2 reports and in the 731. They shall be replaced with 12K8F1D. Unfortunately, I was working in parallel with a CDPD project that has a similar emission designator. I regret for the inappropriate emission designator provided.

I trust that this information will suffice. Thanking you in advance for your kind cooperation. If you have question, please contact me.

Best regards,

Jay Sarkar
