OVERVIEW

This WA-6266-15 DAYTONA 5 Button Wireless Optical Mini Mouse is the latest in optical mouse technology. Its high resolution is 800 DPI that provides the smoothest and most accurate tracking possible. Please read this manual thoroughly and follow the instruction procedures to prevent from any damage to the mouse and any harm to yourself.

Functions:

INSTALLATION

Battery Installation:

1. Remove the battery compartment cover. (1)
2. Install batteries with the positive (+) & negative (-) in the correct direction indicated by the battery compartment label. (2)
3. Replace battery compartment cover. (The red LED on the bottom of the mouse (3) will indicate power to the mouse. CAUTION: Do not point red Optical LED into your eyes or look directly into the optical emitter. Keep away from young children.)

Connecting the Mouse to the Receiver:

Plug in the USB Receiver to any available USB port or hub connected to your computer. (4) (Windows will now detect the mouse and install the required drivers automatically and the light will blink when in use.)

YOUR MOUSE IS NOW READY TO BE USED!

TROUBLESHOOTING

Synchronization:

Windows should have installed the drivers, recognizing the mouse. If not, mouse may be in sleep mode. Click any button once to wake it up. If this does not work, **Changing Wireless Connection Channel** or a **Manual Reconnect Mouse to Receiver** may be needed.

Changing the Wireless Connection Channel:

Hold mouse upside-down. Use a pointed object like a pen tip to click the "CONNECT" button (5) once to change Connection Channel. If problem persists, follow instructions to Reconnect Mouse to Receiver.

Manual Re-Connect Mouse to Receiver

1. Plug in USB Receiver. (3)
2. Click mouse "CONNECT" button once. (5) Note: Click the Mouse Connect button FIRST, then click the receiver's button!
3. While USB receiver is plugged (3) in, press button on the bottom of the receiver within 5 seconds after clicking the connect button on the mouse.
4. Receiver LED will start blinking (7), when connection is established.
5. Move the mouse around to test if successful.
6. If the synchronization is not successful:
 - a. Remove batteries and unplug receiver
 - b. Wait 20 seconds and try steps 1 to 4 again.

If mouse still won't work, re-start computer and follow instructions for Connecting The Mouse to the Receiver and Synchronization.

BATTERY INDICATOR

When battery voltage level goes under the preset level, battery indicator LED on top of the mouse (8) will flash at least three times when moving or clicking the mouse. Mouse will continue to operate for a period, but batteries should be replaced immediately.

RECEIVER STORAGE

For travel and loss prevention, store receiver in cavity on the bottom of the mouse.

Storing receiver :

To store in the mouse bottom (8), place USB plug end of receiver (A) into place then snap bottom of receiver into position (B). Receiver will now be locked into position.

Removing Receiver:

Using the tip of your finger, lift receiver from USB plug end first (9) and remove from cavity. The USB is now active and ready to be inserted into your computer's USB port.

CENTER SCROLL FUNCTION

1. Move the scroll wheel (10) up to scroll up, and down to scroll down.
2. Press scroll wheel down until it clicks and scroll icon appears on the application screen. (11) This will temporarily place the mouse cursor into scroll mode.
3. Move the mouse to scroll up, down, left or right depending on the application function. Press scroll wheel down again to exit scroll mode.

IMPORTANT

1. For optimal performance, mouse should be no more than 3 ft. from receiver.
2. Due to orientation of USB ports on your notebook or hub, the combined connect button/status light may not be in view.
3. When Receiver is stored in bottom of the mouse, it automatically shuts off to save battery power. If the mouse is not moved, it will go into sleep mode. Mouse will wake when moved or button clicked.
4. Optical sensors are rated for most surfaces. Avoid using the mouse on a reflective or mirrored surface as this might cause the mouse to function poorly or not at all.
5. Before boarding an aircraft, remove batteries from the mouse or store the receiver in bottom of mouse (turning it off). The mouse can transmit radio frequency energy when it is activated.
6. The scrolling wheel/3rd button only works with the operating system listed. If is used with operating systems not listed, enhanced function and features as a two-button mouse will be lost.
7. The 4th and 5th buttons are not programmable.

TECHNICAL SPECIFICATIONS

5 Button Optical Mini Mouse
Storable USB Receiver
Standards: USB 1.1 and 2.0 Specification compatibility
Wireless Specification: 27 MHz
Operating Systems: MS Windows 98/SE/ME, 2000/XP, MAC OS X & above

Dimension: (LxWxH): 100mm x 57m x 38mm
Weight: 2.5 oz.
Operation Temperature: 0°C ~ 40°C
Humidity: 5-90% RH non-condensing

FCC COMPLIANCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed or used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in television reception, which can be determined by turning the equipment off and on, the user is encouraged to try and correct the interference by one or more of the following measures:

- (1) Reorient or relocate the receiving antenna.
- (2) Increase the separation between the equipment and the receiver.
- (3) Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- (4) Consult the dealer or an experienced technician for help.

Tested To Comply With FCC Standards
FOR HOME OR OFFICE USE

FCC WARNING: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT NOTE:
FCC Radiation Exposure Statement:
This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.
To maintain compliance with FCC RF exposure compliance requirements, please avoid direct contact to the transmitting antenna during transmitting.
This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

REGISTRATION & WARRANTY

PRODUCT REGISTRATION

Avenues suggests you register your WENGER accessory shortly after your purchase. To register your WENGER accessory, please go to:
