BSMI Number: **SL2-IN-E-041R**

Specification: FCC: 47 CFR 1.1310

EUT is a Part 80 Coastal Station and Routine Evaluation is not required. (47 CFR 1.1310, Table 1)

RF Exposure considerations must be addressed at time of installation.

The following calculation is provided for the advise of installers.

MPE Calculated based on Uncontrolled Exposure
100% Duty Cycle, 6dBi Antenna
Frequency, MHZ 156.000
Limit 0.20mW/cm²
Minimum Safe Distance = $[4 \times 50.00 / (12.56 \times 2.00)]^{1/2}$
= 2.82 m

Calculated By:

David E. Lee, Quality Assurance Manager

(The following will be placed in the Instruction Manual)

Mandatory Safety Instructions to Installers

Antenna Minimum Safe Distance: 2.82m.

Antenna Gain: 3dBd referenced to a dipole.

The Federal Communications Commission has adopted a safety standard for human exposure to RF (Radio Frequency) energy, which is below the OSHA (Occupational Safety and Health Act) limits.

Antenna Mounting: The antenna should be fixed-mounted on an outdoor permanent structure.

RF Exposure compliance must be addressed at the time of installation.

Warning: Maintain a separation distance from the antenna to a person(s) of at least 2.82m for General Population / Uncontrolled Exposure.

The operation of this transmitter must satisfy the requirements of Occupational/Controlled Exposure Environment, for work-related use. Transmit only when person(s) are at least the minimum distance from the properly installed, externally mounted antenna.
