Re: Wireless Link, Fixed Wireless Product Model FWT-8000

Request for withholding from public disclosure proprietary information  
submitted pursuant to an application for certification of a Fixed Wireless  
Product Model FWT-8000

FCC ID: NJIFW8000

Sir/Madam,

Wireless Link requests that certain materials submitted with this application for certification of the Fixed Wireless Product Model FWT-8000 be withheld from public disclosure. This request is made under the provision of Section 0.457 (d) (4) of the Freedom of Information Act, Trade Secrets.

The items marked "Confidential" contain detailed documents pertaining to Fixed Wireless Product Model FWT-8000, submitted to the FCC for review with this application. These documents are specifically:

1. FWT-800\_Block Diagram Baseband Dual-Mode Cellular Phone
2. FWT-800\_Block Diagram RF Part Dual-Mode Cellular Phone
3. Fixed Wireless Base Board, Active Devices
4. Fixed Wireless Base Board, Schematic
5. 0.6w Base Board/RF Assembly Active Devices
6. 0.6w Fixed Wireless Schematic

The documents contain proprietary information (trade secrets) regarding the circuit operation and capabilities (specific values of components, circuit design details and system architecture), which are the result of our extensive investment in research and development. Therefore, we believe that disclosure of these company-guarded materials would compromise our leading position in this market.

We therefore formally request that the materials marked "Confidential" be kept strictly confidential and not made available for inspection by any other party, except on a need to know basis for the sole purpose of the certification process.

Sincerely yours,

Eric Maxon  
Program Director/ Product Development
