

Nemko Test Report: 2006 060511 FCC

Applicant: Westhold Corporation
8430 Via Sonoma #49
La Jolla, California 92037

**Equipment Under Test:
(E.U.T.)** 2165 10.77MHz Race Car Transmitter

FCC ID: NKBTXDP-01

In Accordance With: **FCC Part 15, Subpart C, Paragraph 15.209**
General Limits For Low Power Transmitters

Tested By: Nemko U.S.A..
11696 Sorrento Valley Road, Suite F
San Diego, CA 92121

Authorized By: 
Michael T. Krumweide, EMC Supervisor

Date: 10 July, 2006

Total Number of Pages: 14

EQUIPMENT: 2165 10.77MHz Race Car Transmitter
FCC ID: NKBTXDP-01

Table Of Contents

6.3. TEST SITE FOR RADIATED EMISSIONS	14

EQUIPMENT: 2165 10.77MHz Race Car Transmitter
FCC ID: NKBTXDP-01

1. Summary Of Test Results

Manufacturer: Westhold Corporation

Model No.: 2165 10.77MHz Race Car Transmitter

Serial No.: None

General: **All measurements are traceable to national standards.**

These tests were conducted on a sample of the equipment for the purpose of demonstrating compliance with FCC Part 15, Subpart C for low power devices. All tests were conducted using measurement procedure ANSI C63.4-2003. Radiated Emissions were made on an open area test site.

Inc. accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report.

This report applies only to the items tested.

EQUIPMENT: 2165 10.77MHz Race Car Transmitter
FCC ID: NKBTXDP-01

1.1. Summary Of Test Data

NAME OF TEST	PARA. NO.	RESULT
Powerline Conducted Emissions	15.207	N/A
Radiated Emissions	15.209	Complies

Footnotes For N/A's:

The device is battery powered.

EQUIPMENT: 2165 10.77MHz Race Car Transmitter
FCC ID: NKBTXDP-01

2. General Equipment Specification

Frequency Range: 10.770 MHz

Operating Frequency(ies) of Sample: 10.770 MHz

Integral Antenna

Yes

☒

No

☐

EQUIPMENT: 2165 10.77MHz Race Car Transmitter

EQUIPMENT: 2165 10.77MHz Race Car Transmitter
FCC ID: NKBTXDP-01

3. Radiated Emissions Test Results

NAME OF TEST: Radiated Emissions	PARA. NO.: 15.209
TESTED BY: Ferdinand S. Custodio	DATE: June 30, 2006

Minimum Standard: The field strength of emissions from the device shall not exceed the following limits.

Fundamental (MHz)	Field Strength ($\mu\text{V/m}$)	Field Strength (dB μV)
0.009 - 0.490	2400/F(kHz) @ 300m	—
0.490 - 1.705	24000/F(kHz) @ 30m	—
1.705 - 30	30 @ 30m	—
30 - 88	100	40.0
88 - 216	150	43.5
216 - 960	200	46.0
Above 960	500	54.0

Test Results: Complies. The worst-case emission level is 38.0 dB $\mu\text{V/m}$ @ 3m at 280.13 MHz. This is 8.0 dB below the specification limit.

Measurement Data: (Procedure ANSI C63.4-2003)

Maximizing Emission Levels:

The EUT was powered by a full charged car battery. For hand held equipment or equipment that may be mounted in a variety of positions, the E.U.T. was tested on three orthogonal axis to determine orientation of worst-case emission levels. Below 30 MHz an active loop antenna is used at a fixed height of 1 meter. The loop is rotated about it's vertical axis to obtain worst-case results.

Spectrum Searched:

The spectrum was searched from the lowest frequency generated in the E.U.T. up to 1000 MHz, or the 10th harmonic of the fundamental emission.

Near-Field Measurement:

Emissions below 30 MHz are measured in the near-field and an extrapolation factor of 40 dB per decade is used to determine the 10m limit.

Example: Measurement Distance = 3m
Specification Distance = 30m

10m Limit: Specified limit (at 30m) - $(40 \log \frac{10}{30})$

Thus for measurement at 10m the specified limit is increased by 19 dB.

EQUIPMENT: 2165 10.77MHz Race Car Transmitter
FCC ID: NKBTXDP-01
