Getting Started

Host Linkage

With the HDD(s) installed correctly, you are ready to connect the Disk Array to your Host computer.

Use a shielded twisted-pair SCSI cable to connect your Host computer to the Disk Array's built-in 68 pin SCSI adapter port.

Connect the Host computer as shown below :

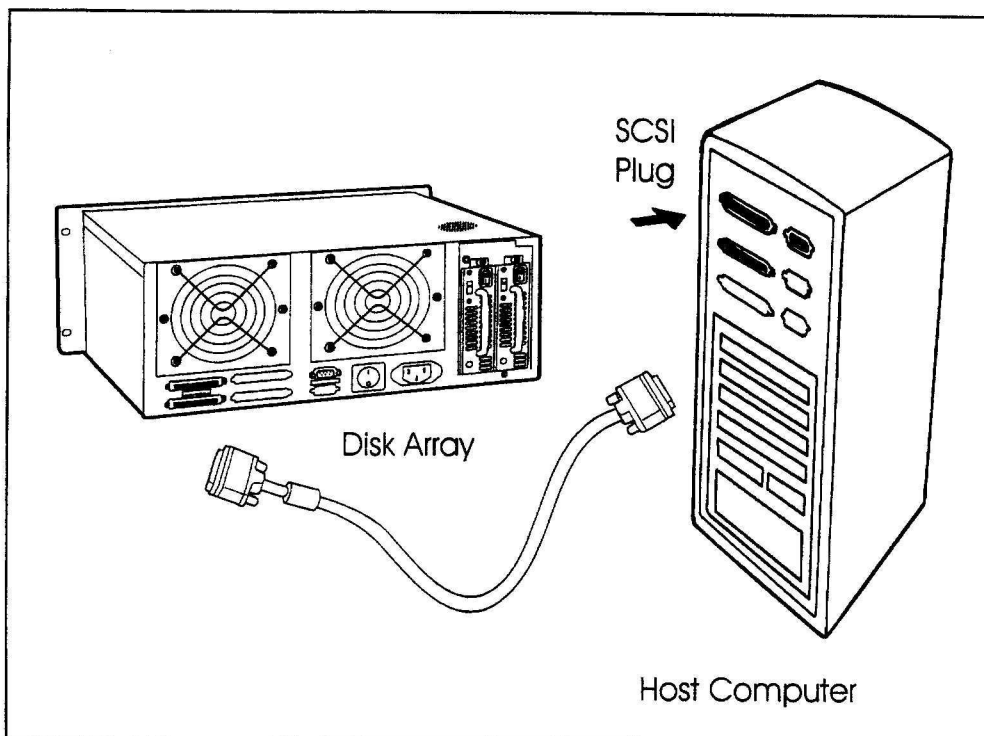

Figure : Host linkage

Caution !

For safety reasons, make sure the Disk Array and Host Computer are turned off when you plug-in the SCSI cable.
