To Whom It May Concern,

Red-M (Communications) Ltd authorise Madge Networks Ltd to use test data from the previously filed grant for the Red-M 3000AS (PEY3000AS2) as the basis for their application for an FCC grant for the Madge Networks Smart Wireless Access Server.

The Smart Wireless Access Server is a variant of the 3000AS built specifically for Madge Networks. (Please see accompanying declaration detailing the differences between the two products for more detail.)

This application is being made to register the Smart Wirelss Access Server under the Madge Networks FCC ID.

With the exception of radiated spurious emissions all exhibits for the Smart Wireless Access Server application are to be taken from the Red-M 3000AS, (PEY3000AS2) grant. Radiated spurious emissions test data for the Smart Wireless Access Server is included in the accompanying report, RP43166A.

Yours sincerely,

Mark Bailey
Senior Approvals Engineer.
Red-M (Communications) Ltd.
