Columbia MD 21046

Requesting permissive change

To Whom It May Concern:

Regarding FCC ID: NKRIMQ8F4, Original grant date: May 4, 2026

The purpose of this Class II Permissive change request is to add Supplemental Coverage from Space (SCS) capability under Part 25 to the existing authorization. This capability is enabled through software updates, and we confirm that there have been no hardware changes to the radio circuitry or antenna system of the device.

Since this device was certified after the June 29, 2024 cutoff date as specified in KDB 273109 D02, we understand that the temporary waiver process does not apply. Accordingly, we are submitting a full technical demonstration of compliance.

Specifically, we are providing the following required exhibit to support this permissive change:

Part 25 Test Report (Report No.: TERF2608002799ER) demonstrating compliance with the technical requirements for SCS operation.

We request the Commission to update the grant to reflect the addition of Part 25 SCS capability with the corresponding Grant Note 07.

Sincerely,

(Signature)
