Subject: Gas Meter/Duty Factor

Ref: Your emails of April 17 and 18 2001.

Chris,

Please be advised as follows:

1. Both NexusData products that were submitted, have the same transmission pattern of 4x160 msec pulses every 24 hours, as shown in the attached timing diagram. <<Doc1.doc>>
2. The statement in your April 17, 2001 email is acceptable by NexusData.
3. The transmission duty cycle factor is : $\% = 100 \times 0.16 / 3600 \times 6 = 0.00074\%$ (based on a 6 hour cycle).

I hope this information is satisfactory .

I will email you separately concerning future units.

Best regards

Shaike Raz
