

Remark:

1. Cell phones or Cordless phones can have the Identifier in the battery compartment under certain conditions.
 - a) The available label area on the phone is limited because they are relatively small and have many contoured surfaces, keypads, LCD displays, charge contacts and/or other connectors.
 - b) The batteries for these devices are designed for easy removal and that the labels will be visible whenever the batteries are removed for charging or replacement
 - c) The label will be readily visible at the time of purchase because the phone will be marketed without the battery installed.
