

HTC Corporation

Date: December 13, 2012

We, HTC Corporation, declare the device of FCC ID: NM8PL80110 , disabled the ad-hoc peer-to-peer, hotspot function, and the software and associated drivers will not initiate any transmission in the following frequency bands.

5150MHz - 5250MHz

5250MHz – 5350MHz

5470MHz – 5725MHz

In DFS frequency bands, the device acts as a client device which does not support radar detection capability. In addition, 5600MHz -5650MHz capability is notched in this device when marketed in US and Canada.

For 802.11 b/g/n function of this device, hotspot capabilities and Ad Hoc functionality is not supported in non-US frequencies. For all 802.11a 5GHz bands, Country code selection is also disabled.

Should you have any questions or comments regarding this matter, please have my best attention.

Sincerely yours,
