2. GENERAL INFORMATION

2.1 GENERAL DESCRIPTION OF EUT

Product	:	PCI 10/100 LAN CARD
Model No.	:	EA-1215
Power Supply	:	DC 5V
Data Cable	:	NA

Note: The EUT is a cost effective, high-performance network interface card. It operates in 10BASE-T and 100BASE-TX modes and integrates easily with Fast Ethernet hub and switch.

The EUT have two mode names which are identical to each other in all aspects except for their model names

- Model: EA-1215, Brand: NETRONIX
- Model: NB-1215, Brand: NETRONIX

From the above models, model: EA-1215 was selected as representative model for the test and its data is recorded in this report.

The EUT was pretested under 10Mbps and 100Mbps speed mode. The worst emission was found in 10Mbps speed mode and only its test data was recorded in this report.

For more detailed features, please refer to and User's Manual.

2.2 DESCRIPTION OF SUPPORT UNITS

The EUT had been tested as component installed into a system and tested together with necessary accessories or support units. The following support units or accessories are used to form representative test configuration during the tests.

Note: Support unit 1-6 acted as CLIENT PC and communicated with support unit 7-11 which acted as SERVER PC and systems of communication partner. They communicated with each other at 10Mbps speed with a UTP (Unshielded Twisted Pair) cable (10m). The SERVER PC was kept in the control room during the test.

2.3 TEST METHODOLOGY AND CONFIGURATION

(Support units 7-11 were kept in the control during the test.)

Both conducted and radiated testing were performed according to the procedures in ANSI C63.4:1992. Radiated testing was performed at an antenna to EUT distance of 10 m on an open area test site. Please refer to the photos of test configuration in Item 5.
