RE.: CONFIDENTIALITY REQUEST ACCORDING TO §0.459 FOR
'Transmitter for Remote Keyless Entry System, FCC-ID: NT8-TX9

This letter serves as an official request for confidentiality under the FCC Rule Section 0.459 (b). We request that the following documents, submitted with this application for type approval according to FCC Part 15, shall be withheld from public review:

- The schematic diagrams, printed circuit board layouts, parts list, specifications, part drawings and block diagrams.

The reason for this request is that these documents are company confidential intellectual property, containing Visteon- and customer confidential information, covered by a non-disclosure agreement, that cannot be patented but contain information that would enable competitors to build the parts from these data, which would give them a competitive advantage.

These documents are given to the test houses on the basis of a confidentiality agreement for type approval purposes only and are not disclosed to the public or a customer, therefore we request, that the documents mentioned herein shall not be disclosed to the public for 15 years after production start.

Do not hesitate to contact me if you have any additional questions.

Thank you very much.

Yours sincerely

A handwritten signature in blue ink, appearing to read "T. Heinisch".

Thomas Heinisch
