

NSA2010
User Manual

Thank you for trusting your communications needs to the NSA2010. You've selected a high performance, palm-sized cellular phone packed with advanced features you will actually want to use. So whether you're an experienced user or a novice, we encourage you to take the time to familiarize yourself with this User Manual and the operation of your phone.

For a quick start up, see the FAST TALK PRIMER section. But first, please read the SAFETY INFORMATION and BATTERY PRECAUTIONS provided.

SAFETY INFORMATION

EXPOSURE TO RADIO FREQUENCY SIGNALS

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals.

In August, 1996, the Federal Communications Commission (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

American National Standards Institute	ANSI C95.1 (1992)	
National Council on Radiation Protection and Measurements		NCRP Report 86
(1986)		
International Commission on Non-Ionizing Radiation Protection	ICNIRP (1996)	

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1).

The design of your phone complies with the FCC guidelines (and those standards).

COMPLIANCE STATEMENT

THIS DEVICE COMPLIES WITH PART 15 OF FCC RULES AND WITH RSS-210 OF INDUSTRY AND SCIENCE CANADA.

OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS:

(1) THIS DEVICE MAY NOT CAUSE INTERFERENCE, AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRE OPERATION OF THIS DEVICE.

ANTENNA CARE

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.
