

## 2 PRODUCT LABELLING

According to Section 18.209 the device shall be identified pursuant to the applicable provisions of subpart J of 47CFR part 2.

The following FCC ID label is the real EUT label and is contained in the product documentation (carton) which is accompanying each item that is marketed for sale.

**Figure 2.1 FCC ID Label on carton**

Due to the dimensions of the device, only the FCC identifier is affixed to each item that is marketed for sale. The underneath photograph shows the location of the FCC ID on the lamp. Each production lamp will be permanently marked with the FCC ID. The marks will be applied to the lower plastic housing which is made from white, glass filled PBT plastic. The ink used will be Markem series 5461 ink, colour reference Markem Brilliant Green.
