Columbia, MD 21046

Gentlemen:

This is a letter to list modifications that were added to the EUT so that it would meet compliance testing.

A ferrite (Fair-Rite P/N: 0431167281 or equivalent) with 1½ turns was added to each cable which connected to the "Input", "Output" and "Horn" jacks on the EUT side.

The cables to which the ferrite beads were connected are not provided with production model of the EUT. Instead, the cables are provided with the optional peripherals that connect to these jacks. The modification listed above will be implemented in all cables sold with peripherals that attach to production models of the EUT. A warning in the user's manual will alert the user that not using the cables provided will void FCC compliance.

If you have any questions or need any additional information, please give me a call at (972) 429-0947.

Sincerely,

A handwritten signature in black ink, appearing to read "Mike Douglas", with a stylized flourish at the end.

Mike Douglas
President
