

6.78MHz antenna information MYLAPS ProChip Tracker

Antenna type:	Magnetic Ferrite bar / Copper coil Antenna
Dimensions:	3.0 x 5.0 x 25.0mm (Ferrite bar outer dimensions)
Material:	Ferrite material and copper.
Gain:	Since the antenna is of the magnetic coil type and very small compared to the used wavelength (25mm length vs 44000mm wavelength) no antenna gain is possible.
External antenna connection:	Not possible
