

- 3) Regarding the labeling, there appears to be 2 photos, one which shows the label partially protruding from the device. The agencies would likely be concerned if it was partially protruding, given the user the ability to pull/remove/destroy the label. Please explain.

GNTX: label will be in the center of the battery compartment and folded inward on each side. It will also be underneath the battery cover. Batteries will also need to be installed by the user since the packaging will not include batteries. Therefore, the FCC and IC ID's will be accessible during the battery install. A revised label exhibit has been submitted.

4) What is the "CEC" label? Is it a "CEC" label? Is it a "CEC" label? Is it a "CEC" label?
