Ref: Confidentiality Request

FCC ID: O2J-CBATG

To Whom It May Concern,

Pursuant to the provisions of Section 0.457(d) and 0.459 of the Commission's rules, Airspan Communications is requesting to withhold the following exhibits supporting our application for the 4G/5G GBSS Call Box ("Call Box") as confidential documentation from public disclosure indefinitely.

- Schematic Diagrams and Parts List
- Block Diagrams
- Internal Photographs
- Operational Description

Confidentiality of the User Manual and Operational Description is maintained by requiring that any party supplied with the information must sign a non-disclosure agreement. The Call Box is a base station with access controlled and only available to trained personnel under a non-disclosure obligation and is inaccessible to general public due to physical location of the device.

We request that the internal photographs, block diagrams, schematics and parts list be confidential long term under FCC guidelines. The applicant has spent substantial effort in developing this product, and some aspects are not generally available to the public and are therefore trade secrets and proprietary. Having this information accessible to the applicant's competitors would negate the advantage that Airspan has achieved by developing this product. Not protecting these details will result in financial hardship.

In addition to the above-mentioned exhibits, Airspan is requesting to the commission to grant short term confidentiality of the following for One Hundred and Eighty (180) days from the date of the grant.

- External Photos
- Test Setup Photos

Sincerely,

A handwritten signature in blue ink that reads 'M.D. Livingstone'.
