File number 5017528 from May 3rd, 2005 has been cancelled and substituted by file number 5017528-M1. Modifications performed:
Test FCC subpart C section 15.247 b) 1 done again with new software (bt agreement). Only handset I7780 BTv1 s/n 5124400020 tested again.

Federal Communications Commission:

FRN:0007-0391-00

Industry Canada:

File Number: IC 5766

TEST REQUESTED

Electromagnetic compatibility

FCC rules (CFR47 Part 15): 2004, subpart C: Information technology equipment. Radio disturbance characteristics. Limits and methods of measurement.

Radio Standards Specification (RSS-210): 2001: Low Power Licence-Exempt Radio communication Devices (All Frequency Bands).

1.1 Test configuration

Power supply AC: 120V / 60Hz.

Set-up: on - table.

For continuous interference:

Automatic test mode: Burn-in test and charging battery when base and terminal tested as a system. (2,4GHz communication between base and terminal)

For the remaining tests:

Automatic test mode: Burn-in test and charging battery when base and terminal tested as a system. 2,4GHz communication between base and terminal.

Terminal locked with base at 20 m distance when base tested alone

Terminal unlocked with base when terminal tested alone

1.2 Communication cables

Two serial cables loaded with impedances

Telephone cable

LAN cable

Detail of results in annex

3.1 Conformity to emissions standards**①.- FCC CFR47 Part 15 rules subpart C: Radiated emissions RF (30-1000 MHz)**

The measured results are below the specification limit by a margin less than the measurement uncertainty; it is therefore not possible to state compliance based on the 95% level of confidence.

However, the results indicate that compliance is more probable than non-compliance with the specification limit.

②.- FCC CFR47 Part 15 rules subpart C: Radiated emissions RF (1-24 GHz)

The measured results are within the limits, even when extended by the uncertainty interval.

③.- FCC CFR47 Part 15 rules subpart C: Continuous conducted emissions

The measured results are within the limits, even when extended by the uncertainty interval.

④.- FCC CFR47 Part 15 rules subpart C: Section 15.247

The measured results are within the limits, even when extended by the uncertainty interval.

⑤.- FCC CFR47 Part 15 rules subpart C: Section 15.249

The measured results are within the limits, even when extended by the uncertainty interval.

⑥.- RSS -210 Section 6.6 (Transmitter AC Wireline Conducted Emissions)

The measured results are within the limits, even when extended by the uncertainty interval.

⑦.- RSS -210 Section 6.2.2 (m2): (Non-momentarily Operated Devices – 2400-2483.5MHz)

The measured results are within the limits, even when extended by the uncertainty interval.

⑧.- RSS -210 Section 6.2.2 (o): (Non-momentarily Operated Devices – 2400-2483.5MHz Spread

Spectrum)

The measured results are within the limits, even when extended by the uncertainty interval.
