

The image shows the back of a black mobile phone. At the top, there is a green rectangular area representing a circuit board, which contains a grey vertical rectangle and a brown circle. Below this, a white label is centered, displaying the following text: FCC ID: O31-A20, IC: 10365A - A20, and Model: A20. The phone's back is secured with eight screws, four of which are visible at the corners. At the bottom, there is a yellow rectangular area with a grey metal bracket in the center. The bracket has a central circular hole and two smaller circular holes on either side. There are also two small circular holes on the yellow area, one on each side of the bracket. A small black rectangular piece is visible at the bottom right corner of the yellow area.

FCC ID: O31-A20
IC: 10365A - A20
