Below is the Industry Canada (IC) label that should be used in 9p23 portable telephone.

Notes:

1. Due to differences in factory printing capabilities at various manufacturing facilities, it is acceptable to print the appropriate product labeling information as long as it is a reasonable facsimile of the pictures in this document.
2. Text to be black, legible and of high definition and quality.
3. Serial number must comprise of 7 digits.
4. Bar codes reflect the serial number.
