

Thank you for purchasing this innovative UNONU device. The specifications in this document are subject to change without prior notice.

UNONU and the UNONU logo are registered trademarks of Swagtek, Inc. Other trademarks are property of their respective owners.

Charge for 24 hours before using.

Install SIM card/memory card.

Get to know your UNONU phone.

Connect your UNONU phone to a computer with a USB Cable (cable not included).

Copy music files from your computer to your UNONU phone.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

SAR Information Statement

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through specific and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phone envelopes is unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. *Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at middle power levels in so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government

adapted requirement for safe exposure. The tests are performed in positions and locations (eg, at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 1.0 (270W/kg) and when worn on the body, as described in this user guide, 0.038 (9W/kg)(body-worn measurements differ among phone models, depending upon available accessories and FCC requirements).

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Query section of <http://www.fcc.gov> after searching for searching on FCC ID: D011715119. Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) website at <http://www.ctia.com>.

*In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watt/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum operation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used in this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

Warranty Certificate
Terms and Conditions
UNONU warrants that these products will be free from defects in material and workmanship. The warranty period is one (1) year for the products and three (3) months for the accessories which are part of the original package including the battery. The warranty period begins the date of purchase by the end-user who shall present an invoice or a bill of sale to UNONU as proof of purchase. UNONU shall repair or replace, without cost to the customer, if a product is a manufacturing defect or defect in workmanship during the warranty period and if the defect occurred under normal conditions of use in accordance with the instructions and specifications stated in the user's manual.
For additional information about the terms and conditions of UNONU's Limited Warranty or RF (radio frequency) service information, please visit the support section of unonumobile.com.

Certificado de Garantía
Términos y Condiciones
UNONU garantiza que sus productos estarán libres de defectos de material prima y mano de obra. El período de garantía es de un (1) año para los productos y tres (3) meses para los accesorios que forman parte del paquete original incluyendo la batería. El usuario final deberá presentar una factura o un recibo de compra cuando vaya al servicio de garantía, de lo contrario, el período de garantía comenzará a partir de la fecha de lanzamiento del producto. UNONU reparará o reemplazará un producto, en caso para el cliente o presente un defecto de fabricación o un defecto de mano de obra durante el período de garantía y el defecto se presente en condiciones normales de uso de acuerdo con las instrucciones y especificaciones indicadas en el manual del usuario.
Para más detalles de la Garantía Limitada de UNONU y para obtener información del servicio de garantía, por favor visite la sección de soporte en nuestro sitio web unonumobile.com.
