

FCC Statement:

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - (1) This device may not cause harmful interference.
 - (2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

- Reorient or relocate the receiving antenna.

adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 0.396W/Kg

measurements differ among phone models, depending upon available accessories and when worn on the body, as described in this user guide, is 0.4172W/kg (0.0012W/kg for SAR in hotspot mode is 0.498W/kg. While there may be differences between the SAR levels of various phones and at various positions,

Equipment Authorization for this model phone with all reported SAR levels evaluated as they all meet the government requirement for safe exposure. The FCC has granted an

Information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) web-site at <http://www.wireless.com>.
 • In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

Endogenous Generation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belts, holsters, and

Body-worn accessories that do not meet these requirements may not comply with RF

exposure requirements and should be avoided. Use only the supplied or an approved alternative.

FCC requirements) differ among phone modes, depending upon available accessories and measurements. The maximum scaled SAR in hotspot mode is 0.498W/kg. While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as

Body-worn Operation
This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the device and the user's body and the handset, including the antenna. Third-party accessories, including similar accessories used by this device, should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to a particular installation. If this equipment does not cause such interference, no other user-controlled measures should be taken. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following:

[illegible]

Bodyworn Operation

This device was tested for typical bodyworn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the antenna, third-party beltclips, holsters, and the user's body and the handset, including the antenna. Third-party beltclips, holsters, and similar accessories used by this device should not contain any metallic components. Bodyworn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holders, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved mounting.

UNONU garantiza que sus productos estarán libres de defectos de materia prima y ensamblaje. El período de garantía es de un (1) año para los productos y de tres (3) meses para los accesorios que forman parte del paquete original incluyendo la batería. El usuario final deberá presentar una factura o un recibo de compra cuando elija el servicio de garantía, de lo contrario el período de garantía comenzará a partir de la fecha de fabricación del producto. UNONU reparará un producto, sin costo para el cliente si presenta un defecto de fabricación o un defecto de ensamblaje durante el período de garantía y si el defecto se produce en condiciones normales de uso de acuerdo con las instrucciones y especificaciones indicadas en el manual del usuario.
