Thank you for purchasing this innovative ISWAG device. The specifications in this document are subject to change without prior notice. ISWAG and the ISWAG logo are registered trademarks of Swagtek, Inc. Other trademarks are the property of their respective owners. Charge for 24 hours before using.	Install SIM card / memory card. Get to know your Iswag phone.	Connect your Iswag phone to the computer using the USB cable (USB cable not included). Copy music files from your computer to your Iswag phone.	FCC Statement 1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference. (2) This device must accept any interference received, including interference that may cause undesired operation. 2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: • Reorient or relocate the receiving antenna. • Increase the separation between the equipment and receiver. • Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. • Consult the dealer or an experienced radio/TV technician for help. SAR Information Statement Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the	network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified by the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 0.288 W/kg and when worn on the body, as described in this user guide, is 0.49 W/kg/bodyweight measurements differ among phone models, depending upon available accessories and FCC requirements. While there may be difference between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov certified after searching on FCC ID: G5534824. Additional information on Specific Absorption Rate (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) website at http://www.ctia.com. In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watt/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements. Bodyworn Operation This device was tested for typical bodyworn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party back-lugs, holsters, and similar accessories used by this device should not contain any metal components. Bodyworn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna. Warranty Certificate Términos y Condiciones ISWAG warrants that their Products will be free from defects in material and workmanship. The warranty period is 12 months from the date of purchase for the products and 12 months for the accessories which are part of the original package including the battery. The warranty period begins the date of purchase by the User and shall extend to the date of purchase of the product. In the event of a defect in the product, ISWAG will repair or replace the product without cost to the customer, if the defect occurred under normal conditions of use, in accordance with the instructions and specifications stated in the user's manual. For additional information about the terms and conditions of ISWAG's Limited Warranty or to obtain warranty service information, please visit the support section at: www.iswagmobile.com Certificado de Garantía Términos y Condiciones ISWAG garantiza que sus productos estarán libres de defectos de materia prima y de manufactura. El periodo de garantía es de 12 meses desde la fecha de producción y de los 12 meses desde la fecha de compra por parte del usuario. El periodo de garantía comienza la fecha de compra del producto por parte del usuario y se extiende hasta la fecha de compra del producto. En el caso de un defecto en el producto, ISWAG reparará o reemplazará el producto sin costo para el cliente, si el defecto ocurrió en condiciones normales de uso, de acuerdo con las instrucciones y especificaciones indicadas en el manual del usuario. Para más información sobre los términos y condiciones de garantía del producto ISWAG o para obtener información sobre el servicio al cliente, visite la sección de soporte en la dirección: www.iswagmobile.com iswagmobile.com Made in China. © 2015 Copyright Swagtek, Inc. 2015
